

Seed Case 3

The Cat Gallery

The Cat Gallery is a Dublin art gallery, with an international reputation, holding an extensive collection of cat-themed paintings, sculptures and other art works.

It has digitised most of its content and has created high resolution archival quality images in tiff format and has created metadata for each item.

They have used simple Dublin Core for their metadata.

The gallery wants to develop an online catalogue of its collections and allow the public to search the catalogue.

They want the public to be able to see the paintings but do not want users to access any high quality tiff images for free.
