

## Seed Case 4

### **Carlingford History Association**

Members of a local historical association want to update their website. At present they have a basic site that lets them advertise local events and upload articles.

The group would like to extend the functionality of the website but are unsure what features they would like.

They have stated they want to generate more interest in the group and reach a wider audience.

They would also like to add new content, such as video, audio and still images and allow potential users to share this content.

They don't think any of their content is restricted, although they have audio recordings from a 2003 project which interviewed a group of senior citizens in the community that asked them about their experiences during the troubles.
